TWEETER TECHNOLOGY

INVERTED DOME TWEETER

- Light Curvature
- Less Directive – Better Spatial Dispersion
- Small Voice Coil Diameter
- Low MASS - High Efficiency / Better Precision
- Structurally Stronger
- Optimum Mechanical Coupling

Aluminum
Inverted Dome

Aluminum/Magnesium
Inverted Dome

Pure Beryllium
Inverted Dome

CONE TECHNOLOGY

SANDWICH CONE TECHNOLOGY

- Two Sheets Of Woven Glass Tissue Are “Sandwiched” Onto The Structural Core Material
- The Variation Of The Number Of Glass Fiber Sheets & The Thickness Of The Central Core Can Easily Optimize The Cone’s Behavior According To The Desired Frequency Range
- Adjusting The Thickness Of The Structural Core Allows Precise Control Of Damping

CONE MATERIAL

POLYGLASS CONE

- Paper Cone With Glass Bead Coating
- Combines The Excellent Damping Properties Of Paper With The High Rigidity Of Glass

FLAX CONE

- Organic Material Grown In France
- Excellent Properties For Lightness, Rigidity & Damping
- Sandwich Cone Technology
- 2 Sheets Of Glass Fibre Are Sandwiched Onto The Structural Flax Core
- Adjusting The Thickness Of The Core Allows Very Precise Control Of Damping

W-CONE

- Sandwich Cone Technology
- 2 Sheets Of Glass Fibre Are Sandwiched Onto The Structural Rohacell Foam Core
- Many Foam Densities To Choose From
- Adjusting The Thickness & Density Of The Core Allows Very Precise Control Of Damping
