

ISOACOUSTICS

**SOUND ISOLATION
COMPONENTS**

2024

ISO ACOUSTICS

Unique Design Provides A High Degree Of Isolation While Resisting Lateral Movement And Oscillations, Which Results In Greater Sound Clarity And Focus

The Internal Reflections Coming Back Up From The Supporting Surface Are Attenuated To Eliminate The Smear And Provide Greater Sound Clarity And Open Up The Stereo Image

Enhances The Sound Quality Of Any Speaker Or Component

NOTABLE IMPROVEMENTS

- Component/Speaker Performs In Free Space
- Greater Clarity & Openness
- Tighter Focus
- Reduced Noise Floor
- Improved 3-Dimensional Soundstaging
- Reduced Bass Smear & Tighter Bass
- More Revealing Details
- Increased Depth Perspective
- Deeper Black Level
- More Contrast
- More Dynamic Colors

PRODUCT CALCULATOR

- Find The Correct Isolator For Your Equipment
- <https://calculator.isoacoustics.com/>
- Based On Weight Of The Equipment
 - Select Component Category
 - Select Make & Model Of Component
 - Product Recommendation
- Indicates Which Isolator(s) Matches The Speaker Or Component In Question
- In The Case Of GAIA Isolators It Will Also Indicate Which Studs Are Required For That Model Speaker & If They Are Included
- Studs Are Available At NO CHARGE

STEP-1

EQUIPMENT TYPE

Choose a category

Lets start by selecting the type of audio equipment.

 Studio Monitor	 Pro Ceiling/Wall Speaker	 Subwoofer	 Guitar/Instrument Amp
 Floor Standing Speaker	 Other Home Audio Speaker	 Component	 Turntable

STEP-2

ISOACOUSTICS

EQUIPMENT MANUFACTURER

Select your make and model

Choose "Other" if your make or model is not in our list.

Make
Focal

Model
Select or type the model

STEP-3

RESULTS

Summary

The following details are what we based our recommendations on.

Category Floor Standing Speaker
Make Focal
Model Sopra N2

Dimensions 14.1 x 46.9 x 21.3 inches (W x H x D)
35.8 x 119.1 x 54.1 cm

Weight 122 lbs (55.3 kg)

Threaded Yes

Thread Size M12-1.25

Recommendations (1)

The existing spikes will make contact with the bottom of the speaker when trying to remove them from the Sopra 2. The solution is to put the speaker on its side and there are bolts that use a hex/allen key to loosen the glass bottom plate. The bottom plate does not need to be removed, but the bolts just needs to be loosened in order to create some space between the speaker and the plate so that the spikes can be removed out the top of the plate. Sopra Cap (Optional) is available for installing on threads on top of glass plate. Additional information on Sopra caps can be found here: <https://isoacoustics.com/home-audio-isolation-products/m12-vanity-cap/>

GAIA I

Note: Matching thread size is included with the GAIA I isolators.

Weight Capacity: 220 lbs (100 kg). The GAIA I provide improved sound clarity and openness for floor standing speakers and subwoofers weighing 220lbs or less. They provide a high degree of isolation and are also a great solution for components and turntables. The GAIA's are threaded into the base of the speaker or component to replace the existing spikes or feet. Threading the GAIA's into the base of the speaker creates a strong connection with the speaker so all of the energy is then managed by the GAIA's internal isolator. Optional accessory: Carpet discs are recommended for medium to thick carpets.
